## Jointmaster Fill & Overband

Overbanding cracks and joints

### Eye Road, Peterborough

**Client:** Skanska Infrastructure Services  
on behalf of  
Peterborough Highway Services

**Site:** A residential road in the city of Peterborough which required repairing prior to surface dressing.

**Problem:** Centre joint failure & transverse cracking

**Solution:** Jointmaster Fill and Overband material was applied to fill and seal the joints and cracks. A band of 200mm wide was applied to the surface to cover over any fretting and open joints.

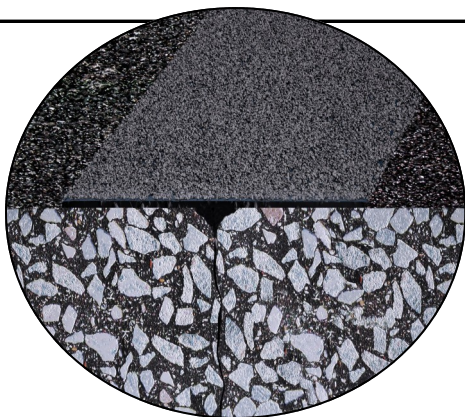

#### Facts & Figures:

- 965 Lin.m was applied in 9 hours
- Work carried out under traffic light control leaving access for traffic at all times
- Whole road was open to traffic at the end of each shift

Longitudinal seam joint

Transverse & Longitudinal repairs

Jointmaster Fill & Overband is applied in a single pass to fill and seal in one operation.

The materials are flexible and approved by BBA HAPAS for treatment of transverse and longitudinal cracking in the carriageway.

The materials can be laid with any band width up to 200mm.
